SQL

WORK EXPERIENCE

R Programming Instructor's Assistant

University of Mississippi

Aug 2021 - Dec 2021 / Oxford, Mississippi

- Assisted in the installation of R-related software for students(mainly Linux systems)
- Personal tutor for learning R concepts and syntax
- Gave feedback for upcoming lectures and projects relating to R
- Projects Oxford, Mississippi

PROJECTS

LCS Player Finder (React WebApp)

Developer

2022 - 2022

- Built a full-stack web app that details North American eSports data for users to navigate.
- Utilized a Two-Step process to display information about each player dynamically through an in-house database.
- Through using precise CSS rules, the user experiences a clean transition in between each data presentation.
- Skills Used: React.js, JavaScript, HTML5, CSS3

Podcast Player (Java)

2021 - 2021

- Using stack-structure I created a Java application that simulates a podcast player.
- User can queue/delete next episode, add an episode, find specific episode, repeat episode, play last episode and print the playlist in full

Member Payment/Donations Log (Java)

2021 - 2021

- Created a library of member data relating to monthly earnings from donations to calculate which member/team earned the most donations.
