## Projects

**Oxford, Mississippi**

### Portfolio Website (React.js)

*May 2023 - Ongoing*

- A React app utilizing React.js, HTML5, CSS3 and JavaScript detailing information about me, my education, past projects and contact info.
- Serves as an omnibus example of many of the skills that I have learned regarding front-end development

### LCS Player Finder (React.js)

*September 2022 - December 2022*

- Utilized HTML, CSS and Javascript to create a responsive web app through react suited for multiple devices while also having mobile priority
- Using a "Two-Step" structure for user navigation to dynamically generate content from an in-house api
- Ensuring a fluid user experience through concise CSS rules that details North American eSports team data as well as data for each player

### Company Inventory/Sales Monitor(Java)

*September 2021 – September 2021*

- Created a program that would log the inventory of the different company locations and sale frequencies
- Iterating through the data the program was able to organize a catalog of all sales attributed to each sales representative as well as the inventory amount for each item as well as their price differences between locations

### Member Payment/Donations Log(Java)

*November 2021 – November 2021*

- Created a library of member data relating to monthly earnings from donations collected to calculate which team earned the most contributions
- Using previously gathered data, the program sorts each team into regions to evaluate which region had the most active donations
